Good Technology Expands Good Dynamics Ecosystem of Mobile Enterprise Apps

Eight New Third-Party ISV Applications Deliver Secure Exchange of Data on and Between Mobile Applications Using Good Dynamics AppKineticsâ„¢ to Increase Employee Productivity and Collaboration

Good Technology,the leader in secure enterprise mobility solutions, today unveiledeight new additions to its Good Dynamics™ ecosystem of third-party enterprise appsin the areas of business intelligence, collaboration, document editing, document printing, file storage/content management, and mobile application development platforms (MADPs). All developed leveraging the Good Dynamics™ mobile application platform and patented Good Dynamics AppKinetics™technology, these new business productivity applicationsenable the secure exchange of data within and between mobile applications, which improves collaboration and productivity among business workers, while protecting enterprise data at rest and in transit through a secure, end-to-end workflow.According to research by Forrester, Inc. the mobile app market will generate $56 billion in revenue by 20151. Companies across all industries today are looking to extend employees’ business productivity beyond the office through the delivery of mobile applications. However, many organisations lack the mobile development resources or knowledge to quickly deliver secure versions of mobile enterprise applications that protect sensitive data across all areas of transport.

With Good Dynamics, developers have access to Good’s industry-leading ‘containerisation’ security technology, as well as application services and features exposed by other internal or third-party ISV Good Dynamics apps.Developers can integrate the Good Dynamics technology into their apps todeliver new services andcreate secure workflows across multiple applications.This helps companies build secure mobile apps quickly, easily, at less cost, and with faster time to deployment than with any other solution.

Additionally, using AppKinetics,developerscan architect apps to securely exchange informationwithin and between applications on a single device,without compromisingsecurity or employees’ privacy and personal experience.This app-to-app interoperability allows companies to create secure, end-to-end workflows so that they can leverage a broader eco-system of protected, interoperable, mobile applications to drive business processes, increase employee productivity and enhance collaboration.

“When it comes to mobile applications, most businesses have a strong need to protect enterprise data whether over-the-air, in use or at rest on the device—to meet even the most stringent security and compliance policies,” said Dimitri Volkmann,VP, Enterprise Product Strategy and Planning,Good Technology. “With Good Dynamics AppKinetics, our customers can securely and easily move enterprise data between multiple third-party or internally developed apps, which allows employees to be moreproductive using the mobile apps and devices of their choice.”

The Good Dynamics Network and Ecosystem of Enterprise Apps

The Good Dynamics Developer Network (GDN) provides developers with direct access to the Good Dynamics platform SDK, servers, resources, and support needed to build, deploy and manage policies for secure mobile applications quickly and effectively.Initially introduced in October 2011, GDN now has thousands of registered users, 1,500 unique registered organisations, and is hosting the testing and production of over 300 unique, registered apps. Additionally, the Good Dynamics partner ecosystem includes many of today’s top enterprise ISVs. Good Dynamics-enabled partner applications include:

Business Intelligence

Roambi for Good Technology— Stunning data visualisations that improve employee decision making with designs that are intuitive to use, fast to deploy, andsimple to integrate with existing BI platforms, CRM solutions, OLAP cubes and spreadsheets.*Cloud Collaboration/Sharepoint and File Access/Sync
