vWorkApp Changes the Way Security Installers and Maintenance Providers Send Jobs to their Workers Out in the Field

Job dispatch and scheduling software can be downloaded via the App Store for iPhones or iPads and via Google Play for Android devices

vWorkApptoday announced that its job dispatch and scheduling software, vWorkApp, willbe showcased at Security 2012 Exhibition. vWorkApp is a new web-based dispatchand scheduling application that sends jobs to your field workers smartphone ortablet device. This application assistssmall to medium-sized businesses with mobile workforce management with a greatsolution for security installers and maintenance providers, by making it easierfor managers to track, schedule and balance jobs across field workers all inreal-time.

Paul-TecSecurity, a security installation and maintenance company based in New SouthWales, have been using vWorkApp for nearly a year, replacing an older systemthat was reported, Cumbersome, with numerous errors and had no interface tocommunicate with the techs. Ray Tozer, the National Operations Manager fromPaul-Tec Security stated, vWorkApp has improved our working life with quickercommunication to field staff and better visibility of job status and workload.

vWorkApp streamlinesbusiness processes giving business owners and workers in the security industry up-to-datedetail on all of their jobs. Job stages are updated easily through vWorkAppgiving more control and scope to managers and dispatchers. Jobs can be tracked easilywith timeline and map views as well as simplified scheduling with drag and dropfunctionality. The fields to be completed by workers are customised andtailored to fit each individual business. Information can be exported into Exceland easily integrated with accounting systems such as MYOB.

vWorkApp isall online which means no specialised hardware is required, just access to theinternet. Day-to-day schedules, routine alarm checks, alarm response, mobilepatrols, installation and maintenance job sheets become paperless. Integrationwith Google Maps also enables route planning and directions, saving time on theroad and better arrival time estimations. vWorkApp is now offered throughBrisbane-based IT firm Solutions to Go Pty Ltd. vWorkApp can be downloaded viathe App Store for iPhones or iPads and via Google Play for Android devices.

vWorkAppwill be attending the Security 2012 Exhibition in Sydney 25th-27thJuly. Come and see the vWorkApp team at Stand Number F21 to meet face-to-faceto discuss your business requirements for a job dispatching solution.
