

4D teams up with Sokkia for mapping software

Australian developer of civil and surveying software, 4D Solutions, has entered into an agreement with Tokyo-based Sokkia Pty Ltd that will see 4Ds 12d Model replace SDR Mapping and Design software in Australia, New Zealand and Asia.

We are excited to be teaming up with Sokkia, which produces some of the most technologically advanced measuring instruments in the world, said 4D Solutions Managing Director Dr Lee Gregory.

Established in Tokyo in 1920, Sokkia manufactures high-quality measuring instruments and has made many contributions over the years to the surveying and measurement industries.

Dr Gregory said the two companies would work closely together to make the transition from SDR to 12d Model as seamless and trouble-free as possible for users. 4D Solutions is currently holding educational seminars countrywide to introduce 12d Model to SDR Mapping and Design users.

About 4D Solutions

12d Model (previously known as 4d Model) was developed by Australian specialist software house 4D Solutions Pty Ltd. It is currently in use at organisations in Australia, New Zealand, Asia, the United Kingdom, Canada and the US.

4D Solutions Pty Ltd is a privately owned Australian company established in 1988. Based in Sydney, the company sells and supports 12d Model direct and through distributors.
