

Atdec Delivers Flexible Swing Arm Mount
 for LCD and Flat Panel Displays

New addition to versatile Telehook family of products securely supports

LCD and plasma flat panel displays while allowing extreme flexibility.

Atdec, Australian designer and manufacturer of display mounting systems, has launched the Telehook 31-55 Swing Arm the ideal solution to securely support and showcase LCD or Plasma flat panel displays, allowing maximum rotation and adjustable tilt for viewing.

The Swing Arm is the newest addition to the innovative Telehook range of products a series of wall, ceiling and swing arm mounts for large LCD or flat panel displays. The range is designed to be used separately or to complement each other.

The 31-55 Swing Arm offers users extreme flexibility. They can position a flat panel display on the Swing Arm from -5 to 25 vertically, from -5 to 5 horizontally, and through 180 rotation from the wall.

The Telehook 31-55 Swing Arm reinforces Atdec's commitment to designing original, sleek and practical quality products that complement the home or office, said Steve Crozier, Managing Director, Atdec Pty Ltd. It allows users to securely mount their LCD or Plasma flat panel display, whilst providing viewing versatility through the adjustable tilt feature.

The Swing Arm also provides customers with the option of adding other products from the Telehook range. Customers can purchase the 31-55 Swing Arm separately and update their existing 31-55 Tilt Wall product, or purchase it as a complete product package within the Telehook 31-55 range, he said

The versatile Telehook range also includes a ceiling mount, which can be included as a part of the Tilt Wall mount package.

The Telehook 31-55 Swing Arm is ideal for LCD and Flat Panel Displays from 31 (78cm) to 55 (140cm). The design features a maximum distance of 554mm from a wall to the back of the display.

Atdec partners with most of the key AV organisations such as NEC, Hitachi, Fujitsu, Samsung, LG, BenQ, Sharp, Sony, Panasonic, Acer, Dell and IBM designing equipment to suit their individual products. These relationships and our own research keeps us informed of worldwide trends ensuring our products meet consumer demand and emerging technology requirements, said Mr. Crozier.

The Telehook 31-55 Swing Arm is available through leading audio visual resellers, information technology resellers and major commercial furniture companies such as Thinking Ergonomix and CEDIA members as well as retailers including Harvey Norman and Domayne. Atdec's Australian State distributors are: Ground Floor Marketing (Vic and Tas), Debetrek (Qld and NT), Sylex (WA), Leader Computers (SA) and Corporate Express; New Zealand distributors are Sylex and Metrolink.

Product enquiries can be made to Atdec on or www.atdec.com.au.
