

# ByteZone introduces the Snazio Pocket Cinema for evaluation and review

The iPod-sized device can store MPEG 1 and 2 movies on its hard drive, then replay them through any television, courtesy of a built-in S-Video/Composite video output. It can also store JPEG files and play them back as a slideshow to a television, while also serving as a portable MP3 player and removable hard disk.

Also doubling as an external hard drive at lightning fast USB2.0 speeds, the Pocket Cinema ships with an infrared remote control unit, making it ideal for business presentation too and whether at work or play you'll never need to carry a bulky laptop around again.

The following assessment units are available now from Word Force Advertising & PR for evaluation.

What: Snazio Pocket Cinema

Capacity: 64MB

Size: Palm Sized

Comments: Li-Ion battery, auto adapter/charger, protective case, AC adapter, composite video cables and s-video cable with an installation CD for Windows 98.

These products are well suited to any features on travel gadgets and presentation tools and provide excellent break out for product showcases or new products sections.

The products have been provided for evaluation by ByteZone, specialising in portable storage solutions selling over the internet [www.bytezone.com.au](http://www.bytezone.com.au)
