

## Cincom to launch the latest release of their CONTROL ERP System at National Manufacturing Week 2010

Worldwide software provider, Cincom Systems (<http://www.cincom.com.au>), today announced an upcoming product release for their flagship CONTROL ERP system and will officially launch at NMW 2010.

The release of CONTROL: 2010 marks a new era in Operations Management. Many ERP solutions are transaction focused and ignore the need for an integrated approach to business. In order to remain competitive in today's difficult business climate, organisations need to have all their business processes aligned to achieve the best possible results. CONTROL: 2010 enables cost efficiency, quality, dependability and flexibility for organisations extending their traditional ERP functionality to total Operations Management by delivering relevant information to each level of an organisation via role based portals for a new user experience. The time savings this generates enables higher productivity and delivers improved ease-of-use for companies, as well as allowing them to exploit collaborative technologies, such as Microsoft's Office Sharepoint Services (MOSS).

Cincom CONTROL is a web-based Enterprise Resource Planning (ERP) solution that extends business acquisition, manufacturing, supply chain execution, financial and regulatory processes for complex and project oriented businesses by streamlining and integrating all key business functions.

We are excited to be offering customers a new approach to business using the latest technologies available to empower their employees. CONTROL:2010 lets you extend your business systems through the organisation with its ability to configure business rules and incorporate work flow said Greg Mills, CEO, Cincom Systems of Australia. With the release of CONTROL:2010 Cincom continues to work closely with its customers to provide them with tools, applications and software to support their business and vision for success.

Cincom is exhibiting its Enterprise Business Solutions at stand J167, Sydney Showground, Sydney Olympic Park during the National Manufacturing week (<http://www.nationalmanufacturingweek.com.au>) show from 11 - 14th May 2010.

ERP for Small-to-Midsize Enterprise (Cincom Priority™)

Enterprise Compliance and Quality Management (Cincom ECQM)

Enterprise Sales Portal Software (Cincom Acquire™)

ERP for Complex Manufacturing (Cincom CONTROL™)
