SYDNEY. January 14, 2010 For the first time, Mac users can now host the market-leading remote access service on either a Mac or a PC, with Citrix Online's newest version of GoToMyPC. The company, a division of Citrix Systems, Inc. (NASDAQ: CTXS), has responded with version 7.0 to better accommodate Mac users seeking a reliable, easy to use remote-access product that is purpose-built for the Mac.

Mac and PC users alike can at last work remotely with confidence from any computer with Internet access and easily access their Mac or PC files, computer programs, email and company network.

With this new release, were giving Mac users what they've been asking for a reliable remote access service built specifically for the Mac, said H.R. Shiever, Asia Pacific Managing Director, Citrix Online. For the large and growing Mac community, they can rest assured of finally having a remote access service that works as advertised from the most trusted name in the category.

According to IDC, which cited Citrix Online as the revenue leader for worldwide remote access services software, with over 70% share of market[1], the Mac offering is a significant move: Customers value Citrix Online's remote access services software GoToMyPC for its capabilities, reliability and ease of use, says Sean Ryan, senior analyst, mobile enterprise software at IDC. With market projections for the Mac and remote access services to grow, GoToMyPC is well positioned in the market.

For Citrix Online customers, the extension of GoToMyPC to the Mac means universal access to remote machines, whether running Windows or Mac OS. And Mac support puts complete remote access services in the hands of customers from a greater variety of businesses opening the door to creative new ways to use remote access.

About
GoToMyPC

GoToMyPC is the fast, reliable, easy and secure way to access a Mac or PC from any Web browser in real time. It created the category for web-based remote access when it was first introduced in 2001, and it continues to be the undisputed market leader. With GoToMyPC, individual professionals and businesses of all sizes can increase their flexibility and productivity by accessing files, programs, email, and their computer networks from any location. The solution is available as a free 30-day trial by visiting: www.gotomypc.com
