

# Click2learn launches Aspen 2.0

- \* First integrated, flexible e-Learning suite combines development, delivery and administration with virtual classroom<BR>
- \* Helps organisations improve workforce productivity and business performance by capturing, creating, managing and disseminating cor

Click2learn Inc. (NASDAQ:CLKS) has launched Aspen 2.0, a new software suite that sets a new standard in e-Learning development, delivery and administration.

The Aspen 2.0 suite is the first solution on the market to integrate a learning management server (LMS), learning content management system (LCMS) and virtual classroom (VC).

Aspen 2.0 comprises a set of modules built on a single, 100%, web-based technology platform that addresses specific business and learning goals. Benefits of the integrated platform solution include:

- \* Shorter implementation times
- \* Lower implementation costs
- \* Reduced training and support costs - single sign-on, consistent user interface and language support
- \* More manageable deployment - one database, common user management, unified security model
- \* Greater functionality at a lower cost.

Another key benefit of Aspen's single, integrated platform is the significantly reduced cost of owning, deploying and maintaining e-Learning software.

Aspen's open architecture also enables easy integration with an existing IT infrastructure.

## Core applications

Core applications include full-featured LMS, LCMS and virtual classroom modules including:

- \* Collaboration Center - Increases productivity by providing online access to experts
- \* Personalised Delivery - Reduces learning time by adapting courses to the learner's needs
- \* Information Management - Delivers timely information to support daily tasks
- \* Performance Management - Helps realise business goals by managing performance objectives and competencies
- \* Simulation Editor - Creates realistic, interactive scenarios for presentations, practice and performance testing.

## Standards support for global enterprises

The Aspen platform supports multi-channel delivery such as mobile devices, and is compliant with all industry standards including XML, vCalendar, SCORM, AICC and Section 508.

Designed to scale to global enterprises, Aspen 2.0 also supports multiple languages, time zones and currencies.

Additional information on Aspen 2.0 can be found on the Click2learn Web site at:

<http://home.click2learn.com/en/aspen/index.asp>

## Pricing and availability

Australian/New Zealand pricing for the Aspen 2.0 will be announced next month.

## About Click2learn

Click2learn (Asia Pacific) is a partnership formed in 2001 between Click2learn Inc. (NASDAQ: CLKS) and Angus Knight.

A leader in the e-Learning industry, Click2Learn Inc has the largest installed base of e-Learning customers in the world. Founded by Microsoft co-founder Paul Allen and headquartered in Bellevue, Washington USA, the corporation's award-winning software is used by Global 2000 companies to capture, manage and disseminate knowledge for employees, partners and customers.

Click2learn's Aspen Enterprise Learning Platform is the most complete enterprise learning solution in the industry, a fully integrated end-to-end platform unique in its ability to create, deliver and manage learning experiences from a single platform. Click2learn's customers include American Express, IBM, Bankers Trust, Intel and General Motors.
