

# Engin Offers Best Ever VoIP Deal for Residential Customers

600 Minutes of Calls to Local, National, Mobile and 100+ International Destinations

Engin (ASX:ENG), Australia's leading broadband telephony company, has released an industry-best deal for consumers. The Engin Max Plan allows residential customers to make 600 minutes of calls to local, national, mobile and more than 100 international destinations (including some international mobile destinations) for just \$29.95 per month.

International mobile destinations include Canada, China, India, Hong Kong, Malaysia, Singapore, South Korea, Thailand, USA and Vietnam. For a full list of international destinations please [click here](#).

Greg Crameri, Residential Marketing Manager for Engin said: We've been offering VoIP (Voice over Internet Protocol) technology to residential customers since 2004 and they've told us they want a simple plan which covers all call types. So we built it. We believe this is the best offer on the market. This means customers can cut their phone costs and control their spending. And heavy users who go over the 600 minutes a month are still entitled to our extra low normal rates.

The rates after the 600 minutes are used up are 15c for local and national calls; 27c per minute for mobile calls; and international rates from 1.9c per minute.

People with a network of friends and family living in other countries who need regular contact and real conversations will make phenomenal savings.

If you haven't looked at VoIP before, now is the time. For those who have been a bit wary of VoIP in the past, let me assure you that when we say this is easy, it's true. And all this comes with a no risk 30 day trial, Crameri said.

To be able to use the Engin service people need a broadband Internet connection (cable modem, ADSL); a router or switch; an Engin Voice Box (which converts the analogue phone signal to digital) and any cordless and corded telephone or an Engin Internet phone.

To sign up for the service, please go to [www.engin.com.au/](http://www.engin.com.au/)

About Engin Limited [www.engin.com.au](http://www.engin.com.au)

Engin is an Australian owned and operated telecommunications company listed on the Australian stock exchange (ENG).

The Engin service delivers Voice over Internet Protocol (VoIP) telephony services. Any broadband user is able to make and receive calls using their existing telephone handset. VoIP sends voice signals over the Internet, rather than through the regular telephone network. The advantage of this technology is significantly reduced local, mobile and international call rates.

Engins growth has been underpinned by a 2007 strategic partnership with the Seven Network.
