

# Get your home movie into someones else's home!

Snazio Pocket Cinema offers MPEG and JPEG playback anywhere, anytime

Ever wanted the freedom to watch your home movies anywhere you go without a laptop?

The Snazio Pocket Cinema from ByteZone makes it possible.

The iPod-sized device can store MPEG 1 and 2 movies on its hard drive, then replay them through any television, courtesy of a built-in S-Video/Composite video output.

Snazio can also store JPEG files and play them back as a slideshow to a television, while also serving as a portable MP3 player and removable hard disk.

It also doubles as an external hard drive at lightning fast USB2.0 speeds.

Snazio ships with an infrared remote control unit, making it ideal for business presentation too and whether at work or play youll never need to carry a bulky laptop around again.

The Snazio Pocket Cinema includes:

Li-Ion battery

Auto adapter/charger

Protective case

Infra Red Remote Control unit

Composite video cables and S-video cable

AC adapter

Installation CD for Windows 98

Easy to use, the possibilities are endless!
