

# Integral Energy selects Utilisoft's GateKeeper

Utilisoft will supply GateKeeper 4 software to enable Integral Energy to manage energy market transactions for all of its electricity customers in New South Wales.

Integral Energy selects Utilisoft's  
GateKeeper

Melbourne, Wednesday 12th  
January 2011. Utilisoft Pty Ltd, a  
Bglobal plc company (AIM:BGBL) and leading provider of energy market  
integration solutions, has signed a contract to supply a National Electricity Market  
(NEM) Network Gateway to Integral Energy, the second largest state-owned energy  
corporation in New South Wales, Australia.

Utilisoft  
will supply GateKeeper 4 software to enable Integral Energy to manage energy  
market transactions for all of its electricity customers in New South Wales.

Allen  
Taylor, Commercial Director of Utilisoft commented:  
Recent changes introduced in the New  
South Wales energy market presented an opportunity  
for Integral Energy to rationalise their IT systems in a shared services  
arrangement with other state owned utilities. Utilisoft will implement our  
commercial off-the-shelf GateKeeper 4 energy market gateway solution to enable Integral  
Energy to continue leveraging the strengths of their existing business  
processes while communicating through market compliant gateway protocols. Taylor added, "GateKeeper 4 is the most scalable,  
manageable, and customisable energy market gateway solution available in Australia and  
we are proud to welcome Integral Energy as our newest customer."
