

Kaseya Small-Medium Enterprise Edition Wins Gold Medal Editors'™ Best Award From Windows IT Pro Magazine

Developed with the needs of small and medium-sized IT departments in mind, SMEE is ideal for the cost conscious IT department that needs to deploy a systems management solution rapidly and achieve ROI quickly.

Kaseya, the leading global provider of automated IT systems management software, today announced that the Kaseya Small/Medium Enterprise Edition (SMEE) was named as a gold medal winner of the 2010 Editors Best Awards in the Best Task Automation Product category by Penton Medias Windows IT Pro magazine.

Developed with the needs of small and medium-sized IT departments in mind, SMEE is ideal for the cost conscious IT department that needs to deploy a systems management solution rapidly and achieve ROI quickly. SMEE is an on-premises solution that liberates IT managers by automating ongoing routine IT tasks - ensuring systems are kept secure and accessible to employees, resulting in increased end-user productivity. SMEE includes the essential building blocks for IT departments to automate the administration of their systems. The system provides visibility to the network while creating a flexible and secure solution for IT managers to deploy software and patches, submit tickets, inventory assets and facilitate remote computer access for the Windows and Mac OS X platform.

The 2010 Editors Best Awards presented in conjunction with our 2010 Community Choice Awards are a recognition of our editors, contributors and authors favorite products of the year, said Jason Bovberg, senior editor at Windows IT Pro. Our editorial experts' annual tradition of selecting winners based on a products strategic importance to market, its competitive advantages, and its value to the customer is particularly significant to the Windows IT Pro and SQL Server Magazine communities this year, as we call out exceptional products in an economically tight, highly competitive market.

Our Editors Best Awards let us leverage our

contributing editors expertise to provide well-earned recognition to products that exceed industry standards. This year, weve even added valuable, in-the-trenches insight about winning products from our reader community. We're proud to now share this invaluable information with our Windows IT Pro and SQL Server Magazine communities. Our winners should be extremely proud of this honour of recognition from our editorial experts.

Were pleased to receive this distinguished award for the Kaseya SMEE solution, said Jim Alves, executive vice president of strategy and product marketing at Kaseya. Our SMEE solution is the extra resource IT departments need to reliably automate the recurring IT tasks that keep systems secure and available for the benefit of the users and the organisation.

Kaseya serves a global customer base of more than 10,500 on-premise and cloud customers with millions of agents deployed, including Windows PCs, Linux servers and Mac notebooks.
