Kingston Ships Next-generation Secure USB Flash Drive for Consumers

DataTraveler Locker+ G2 safeguards sensitive, personal information

Lower price for peace of mind data security

Versatile data protection works on both Mac and PC Systems

Sydney, Australia &ndash; July 12, 2012 &ndash; Kingston, the independent world leader in memory products, today announced the second-generation of its popular DataTraveler Locker+ secure USB Flash drive. The new, lower priced DataTraveler Locker+ G2 works interchangeably between Mac OS X and Windows systems and all data is secured with hardware-based encryption.

Users simply set up a password upon first use for access, and the drive is as simple as plug and play with no extra software or partitions needed.

TheDataTraveler Locker+ G2 also features a password manager that allows users to store names and passwords for up to 20 accounts. The stylish, durable metal casing also features a key loop for easy attachment to a backpack, briefcase or purse.

Nathan Su, Flash Memory Sales Director, APAC Region, Kingston said, &ldquo;Data security for consumers is simple and affordable with the newDataTraveler Locker+ G2. The data encryption makes this the perfect USB drive to keep your information safe and out of strangers&rsquo; hands in case it ever gets lost. Users can take their data between Mac and PC systems with ease, and also safely store login information to websites with the included password manager.&rdquo;

TheDataTraveler Locker+ G2 is available in 4GB, 8GB, 16GB and 32GB capacities. It is backed by a five-year warranty and free technical support.
