DDR2-667 memory ready to enhance current laptops with no overclocking required

Kingston Technology introduces first high-performance low-latency DDR2 notebook memory for global market

DDR2-667 memory ready to enhance current laptops with no overclocking required

Sydney, Australia – 28 April 2008 -- Kingston Technology Company, Inc., the independent world leader in memory products, today announced it is first to offer high performance, low-latency DDR2-667 SO-DIMM notebook memory to the world. Offering greater performance options for existing mobile platforms, the HyperX DDR2-667 CL4 SO-DIMM kits in 2GB and 4GB capacities are the first in a new line of memory innovations Kingston plans to release over the next few months to the notebook market.

“Kingston customers asked about higher performance memory for current notebooks and our new DDR2-667 CL4 low-latency SO-DIMMs are the first in a series of new HyperX memory offerings to support this market,” said Vaughan Nankivell, regional manager, Australia/New Zealand, Kingston. “We will continue to expand the product line, including developing a 3GB memory kit.”

The new HyperX DDR2-667 CL4 high performance mobile memory is a perfect fit for notebook users who want to boost system performance by replacing their standard notebook memory with high-performance modules that boot to the highest speed possible ― without any need to adjust system BIOS settings.

Kingston HyperX memory is backed by a lifetime warranty and free technical support. For more detailed information on Kingston products, please visit the Kingston website at: www.kingston.com/anz or call toll free on 1800 649 469.

About Kingston Technology Company, Inc.

Kingston Technology Company, Inc. is the world’s largest independent manufacturer of memory products. Kingston designs, manufactures and distributes memory products for desktops, laptops, servers, printers, and Flash memory products for PDAs, mobile phones, digital cameras, and MP3 players. Through its global network of subsidiaries and affiliates, Kingston has manufacturing facilities in California, Taiwan, China, Malaysia and sales representatives in the United States, Taiwan, China, India, Australia, New Zealand, Europe, Russia, Turkey, and Latin America.
