

Kingston Technology Rolls Out First PC2 8500 Memory Quad Kits

New HyperX 1066MHz DDR2 4GB Configuration Offers High-Performance Environment to Gamers, PC Enthusiasts at Lower Cost Option

Sydney, Australia– 20 February 2008 – Kingston Technology Company, Inc., the independent world leader in memory products, today announced it is first to produce 1066MHz DDR2 memory modules in quad-kit configurations. Initially released under the Kingston HyperX brand, the innovative memory combination uses four 1GB modules, specifically designed to work together as a powerful 4GB unit, to support high performance processing demands.

“Four gigabyte configurations are becoming increasingly popular in gaming and enthusiast applications, supporting both the Vista™ operating system and the high processing needs of games and sophisticated software,” said Vaughan Nankivell, regional manager, Australia/New Zealand, Kingston. “Introducing a four gigabyte kit using four 1GB modules provides a low cost solution to consumers wanting the performance of a four gigabyte unit without the price tag.”
