

# LED LENSER H5 Headlamp

LED LENSER OPTOELECTRONICS

NEW

LED LENSER H5 BACK LIT HEAD LAMP

A

super versatile, comfortable head torch with a rear facing red LED ideal for night jogging, cycling and walking (also rock climbing! See photo attached.)

The

new Led Lenser head lamp features a new advanced focus system to provide an easy transition from spot to flood.

The

red LED in the battery box provides a great back light, which is very handy in any dark situation for additional safety and security.

The

lamp head has an adjustable head strap and the torch can be swivelled within an angle of 90 degrees and the 30 lumens beam range can light up to 51 metres.

LED

LENSER focus and reflector systems feature the most advanced technology that pumps up the light produced by the LED, the result is a broader, deeper and more powerful beam of light without the usual dead spots from lesser products.

This

great little headlamp runs for 30 hours on 3 x AAA alkaline batteries and weighs a tiny 116 grams.

The  
LED LENSER is priced at \$64.95 RRP [www.zenimports.com.au](http://www.zenimports.com.au)
