

## Logitech Speaker System Z313 Offers Balanced Sound in a Compact Design

SYDNEY, Aust. 30th June 2010 Logitech, a leading manufacturer of PC speakers, today announced the Logitech Speaker System Z313. If you want to improve your experience when listening to music or watching movies on your computer, the Speaker System Z313 gives you what your built-in computer audio cant.

### The Logitech

Speaker System Z313 is a 2.1 system that is sure to fill your room with sound despite its compact size. When youre listening to music or watching TV on your computer, the Speaker System Z313 delivers with balanced sound as a result of the 25 watts (RMS) of power. Playing a dual role, the subwoofer delivers deeper base when you really want to feel the beat. Plus, the efficient design makes it easy to store in tight places.

### The speakers

feature a convenient control pad which allows you to easily turn on your speakers, adjust the volume or plug in your headset when you want to enjoy private listening. The headphone jack also offers a convenient solution if you want to listen to music from your iPod just plug it in.

### Along with being

easy to control, the Speaker System Z313 is easy to set up. All you have to do is connect the speakers to the subwoofer, connect the subwoofer into your computer using the provided cable, and plug in the power. Thats it. And since the speakers connect to a computer using a standard 3.5 mm audio output jack, they are compatible with any computer running Windows XP, Windows Vista or Mac OS X 10.3.9 or later.

### Pricing and Availability

The Logitech Speaker System Z313 is expected to be available in Australia from July for a suggested retail price of \$79.95 incl GST.

### About
