

Massive growth at Oxygen Business Solutions

Search for 34 new staff reflects Oxygen's success in the South Pacific Region

Following a series of senior appointments in the last six months Oxygen Business Solutions, the leading specialist SAP outsourcing and consulting company in Australia and New Zealand, is actively seeking 34 new staff to deepen and boost its existing, solid base of SAP professionals.

Some of the roles that Oxygen is looking to fill in its Auckland office include: SAP Consultants with three years of SAP financials experience, consultants with Accounts Payable expertise and SAP Functional Consultants with in-depth knowledge of SAP's SD, PP, PS, MM, CO or FI modules. In addition, Oxygen is looking to recruit SAP BW specialist consultants for the Melbourne and Sydney offices, including a Senior Consultant with strong SAP Technology focus, a Functional Consultant with SAP functional experience with one or more R/3 modules such as; BW, CRM, APO and SRM and, a Senior Team Leader with significant experience in SAP Logistics/Financials to join the Sydney office.

Oxygen's specialist business professionals will number 300 employees spanning the Tasman with the appointment of the 34 new staff. This represents a significant growth in the capability of Oxygen as well as the pool of resources available to SAP customers in Australia and New Zealand.

"We are pleased to leverage the local IT talent. This underpins our commitment to expanding our operations with local IT talent in both Australia and New Zealand," said Mike T Smith, Oxygen's Chief Executive. "The new hires will strengthen our organisation and add significantly to our ongoing ability to help businesses drive value from their SAP implementations and related IT investments, all at a time when other IT service providers and outsourcers are downsizing their operations or sending work offshore" he continued.

"Oxygen has a proven track record in reducing costs and improving the value of IT. Oxygen is now a key service provider to 27 businesses in a range of industries across Australasia, such as Sancell, Cadbury Schweppes, TVNZ and Whitcoulls. This is in addition to the 26 business units within Carter Holt Harvey that Oxygen also supports," he said.

Recent senior appointments at Oxygen Business Solutions include: David Moores to the role of Professional Services Manager and Rod Hirst as General Manager Sales, based in Melbourne and Natasha Whiting to the role of Human Resources Manager for Australia and New Zealand.

Ends.
