

## NetSuite to Launch as First Mid-Market Cloud Computing ERP Suite for Google Apps Marketplace

NetSuite Inc. (NYSE: N), a leading vendor of cloud computing business management software suites, today announced that it plans to make its cloud computing enterprise resource planning (ERP) suite available in the Google Apps Marketplace, Google's recently launched online storefront for Google Apps products and services. NetSuite's cloud-based ERP suite enables users to run their key back-office operations and financial business processes including accounting, inventory and supply chain, order management and business intelligence with a single, comprehensive SaaS application. For more information please visit [www.netsuite.com/NetSuiteforGoogleApps](http://www.netsuite.com/NetSuiteforGoogleApps).

NetSuite is committed to bringing the power of cloud computing to businesses, so integrating with Google Apps is a logical choice for us," says Zach Nelson, CEO of NetSuite. "By adding NetSuite to the Google Apps Marketplace, we plan to make it extremely easy for Google Apps customers to get a powerful cloud computing ERP application that works seamlessly with their technology platforms."

Google Apps customers integrating with the NetSuite business management software suite will get instant visibility into real-time financial, operational performance and documentation across their entire company securely from any browser-enabled devices. In addition, companies can reduce cost and increase productivity by enabling real-time collaboration on financial data across geographically dispersed teams.

"We are very excited to soon be offering NetSuite in the Google Apps Marketplace," adds Scott McMullan, Google Apps Partner Lead for Google Enterprise. "Through the Google Apps Marketplace, software vendors like NetSuite are helping us build a rich ecosystem of integrated business apps that work seamlessly with Google Apps, allowing IT administrators to leverage the benefits of cloud computing and extend Google Apps to meet more of their business needs."

The Google Apps Marketplace makes it easy for more than 2 million Google Apps customers to discover, purchase and deploy integrated business applications and related professional services. By integrating with user account and application data stored in Google Apps, these cloud applications provide a simpler user experience, increase business efficiency, and reduce administrative overhead. Google Apps brings simple, powerful communication and collaboration tools to organizations. With Google Apps, users can use applications such as Gmail webmail service, Google Talk instant messaging service, Google Calendar calendaring service, Google Docs program, Google Sites web application, and Google Video for business on their own domain to work together more effectively. Best of all, it's all hosted by Google, so there's no hardware or software to download, install or maintain.

## Cautionary Note Regarding Forward-Looking Statements

This press release contains forward-looking statements relating to expectations, plans, and prospects including expectations relating to the future availability of NetSuite's ERP suite in the Google Apps Marketplace. These forward-looking statements are based upon the current expectations and beliefs of NetSuite's management as of the date of this release, and are subject to certain risks and uncertainties that could cause actual results to differ materially from those described in the forward-looking statements including, without limitation, the risk that NetSuite and Google do not reach a final agreement regarding NetSuites availability on the Google Apps Marketplace, that either party decides not to move forward with the project or difficulties that could be encountered in completing the application integration. All forward-looking statements in this press release are based on information available to the Company as of the date hereof, and NetSuite disclaims any obligation to update these forward-looking statements.
