

OBS offers complete mobility for SharePoint users across

Mobile Enterprise provides users with the ability to connect to SharePoint sites and applications from their Smartphone or tablet device.

OBS specialises in helping transform our customers businesses with SharePoint. With the explosive growth and demand for mobile solutions OBS is now able to offer their customers a cost effective mobile SharePoint solution using the Mobile Enterprise Solutions Framework, said Andy Neumann, Managing Director, OBS.

H3 Solutions welcomes OBS to our growing global partner program, said Lisa Ruff, Business Development Manager at H3 Solutions (who owns Mobile Enterprise). OBS has the proven SharePoint experience and as the countrys leading SharePoint specialist they are well positioned to excel in providing their customers mobile SharePoint solutions using our Mobile Enterprise Solutions Framework.

OBS is a leading Australian IT services company focused on helping organisations transform their businesses using Microsoft technologies. We have over 11 years of experience helping over 300 Australian government, public and private organisations including a quarter of the ASX 200. Our services are supported by hundreds of customer-ready solutions from consultant created intellectual property, to components and processes that accelerate projects and de-risk engagement outcomes. OBS has over 150 employees throughout Australia in 5 offices.

Founded in 2006, H3 Solutions (www.h3s-inc.com) is known for its expertise in Microsoft SharePoint technologies. A Microsoft Gold Certified Partner, H3 Solutions provides software and consulting to clients in both the public and private sectors. H3 Solutions is likely best known for the creation of the mobile application framework for SharePoint, Mobile Enterprise (the industry's first SharePoint-integrated development platform for mobile applications). H3 Solutions is based in Virginia, and is privately held.
