

P1203 Projector - Bringing visuals to life!

Sydney,

Australia:17 August 2010 The DLP 3D ready Acer P1203 projector

presents life like breathtaking visuals and exceptional performance in any environment. Designed for SMBs and classrooms, the Acer P1203 offers convenient utilities like easy set up, advanced power management and colour boost technologies that give brilliant output and easy usability. The Acer P1203 presents prolific imagery with an assortment of full features. The Acer ColorBoost II+ technology brings nature's true colours to life with an optimized 6 segment colour wheel design and a DLP light engine - improving brightness, colour and providing powerful image processing. For high-impact video entertainment, big screen gaming, movies or stunning 3D classroom lessons, the DLP 3D ready kit with advanced software enables a 120Hz refresh rate to render a flicker free 3D experience. The P1203 exhibits true quality output, with high brightness, resolution and contrast ratio. The XGA resolution brings sharp details and fine print into focus, allowing for users to adjust the level of display detail required for any usage scenario. Similarly, the 3100 ANSI brightness and the 3700:1 contrast ratio project crystal clear, vibrant images from a long distance onto the screen. Gaba Cheng, Product Manager, Digital Display, Acer Computer Australia comments on the intuitive design and usability: The P1203 is designed for convenient installation, and comes with features like Auto Keystone correction and Auto Ceiling-mount correction, allowing for adaptability in any environment. By activating the Auto Keystone correction, vertical distortions are automatically corrected to give audiences a rectangular view, while the Auto Ceiling mount corrections gravity sensor automatically detects that the projector is ceiling mounted and instantly rotates projected images by 180 degrees to ensure the correct orientation. The P1203 comes complete with environmentally friendly functionality. The Acer EcoProjection reduces standby power by up to 80%, while the Auto-ECO feature will put the projector into ECO mode if there is no signal input for 5 minutes, resulting in up to 20% further reduction of power consumption. When you factor in the Acer ColorSafe feature and the lamp life of up to 4000 hours, the P1203 boasts attributes like protection against colour decay, guaranteed picture integrity, further extending the lifespan and further translating to overall cost savings!
