

Panaseer launches complete managed Internet services offering for mid-sized corporates

EasyStreet eVPN offers cost effective domain name services, email and web hosting, firewall and telehousing in a single package

Australian-owned specialist telecommunications services provider Panaseer, has launched a complete managed Internet services offering for Australia's mid-sized corporates. The service, EasyStreet eVPN, offers a full range of the latest Internet services - from access, domain name registration and re-delegation, email and web hosting, to managed firewalls and telehousing - in individually tailored packages.

EasyStreet eVPN service offers significant savings on Internet related costs for mid-sized corporates. In addition, the service offers high reliability and security and is maintained, optimised and continually monitored.

According to Bruce Hampel, Panaseer's chief operating officer, With the eVPN Internet services, Panaseer offers mid-sized corporates the opportunity to use their IT resources more efficiently. IT staff no longer have to use valuable time to source and manage Internet services. Panaseer will advise on the best combination of services for each business and will implement, maintain monitor and optimise them.

Our business partners no longer have to be concerned with making costly investments in Internet hardware and software, or with diagnosing and fixing problems across multiple suppliers. With EasyStreet eVPN, they have a single point of contact, and the full responsibility for the service operation lies with Panaseer.

Cost savings on Internet services

Panaseer's EasyStreet eVPN services aims to save mid-sized corporates money on Internet services.

The service is implemented for zero capital outlay and for a fixed, predictable monthly fee, and tailored to match the service needs of individual companies.

The monthly fee also includes ongoing network operation, management and maintenance.

Summary of Panaseer's EasyStreet eVPN services:

Internet access - eVPN provides a powerful and cost effective Internet connection, connecting geographically dispersed offices via secure network tunnels. It also provides company wide access to email, client servers and Intranet sites. Access is over dedicated lines and remote and mobile users can also dial in. eVPN Internet services are monitored and managed on a 24x7 basis through Panaseer's Network Operations Centre.

Hosting services

eVPN gives customers access to the latest hardware, software and resources without the need for capital outlay. Email services are implemented, operated and managed, domain names registered or re-delegated and hosted by Panaseer. Panaseer also hosts customers websites on its secure web servers.

Managed firewall

High levels of security are a key feature of Panaseer's eVPN service. eVPN uses a state-of-the-art managed firewall to deliver a secure connection between a customer's network and the Internet. The firewall acts as a gatekeeper the Internet and internal networks, ensuring only authorised traffic passes into and out of a customer's network. It also eliminates the security risk associated with remote offices and mobile users dialing into a corporate network via the Internet.

Panaseer tailors the firewall to match customer's needs and it is monitored on a 24x7 basis.

Telehousing

As part of the eVPN offering, Panaseer offers a telehousing service, so that customers can save valuable office space by housing network equipment at Panaseer's secure facility. Panaseer's telehousing service includes 24x7 monitoring to ensure equipment is always working at optimum performance levels.

Pricing and availability

Panaseer's new EasyStreet eVPN service is available immediately. Pricing is tailored according to individual needs and is available on request.

Background

Panaseer is an Australian-owned telecommunications service provider established in October 1999 as part of the Techniche group (ASX:TEH 96.01%).

Panaseer is focused on providing Australian corporates with tailored, integrated voice, data and Internet telecommunications solutions at lower cost. Panaseer has expertise developed from over 13 years of telecommunications hardware, service and industry experience. This experience includes providing telecommunications solutions for over 1,200 businesses, with over 7,000 offices and sites networked nationwide.

Recognising the increasing complexity associated with designing and operating a telecommunications network, Panaseer simplifies the choice for Australian corporates by packaging the companys products, expertise, and services under a portfolio of managed services.

Panaseer is derived from panacea meaning cure for many things, and seer being farsighted and wise.

The company headquarters is in Ryde, Sydney, NSW and it has offices around Australia in mainland capital cities.
