

PCMCIA Cardbus USB2 3 port hub

Stuck in a rut with USB1.0? You and your data get a boost by adding the USB2.0 PCMCIA Cardbus to your laptop. With blazing data transfer at 480Mbps, the Cardbus offers instant expansibility for laptops, realising the full speed potential of plug and play accessories.

With 3 USB ports, multimedia maniacs can access their MP3 player, Digital Camera and external hard drive all in one hit. MP3 files and pictures can be downloaded to the laptop, edited and backed up to an external hard-drive such as the USBNet Anypak or Flotec Pockey.

Fully backward compatible with first generation USB, USB1.1 accessories don't get thrown out with the bathwater. The Cardbus is supported on Win98, WinME, Win2000, WinXP and MAC OSX operating systems and is available through www.bytezone.com.au.
