Stone Temple Pilots

Alive In The Windy City

Filmed at a sold out Riviera Theatre in Chicago in March 2010, Alive In The Windy City is the first Stone Temple Pilots live concert to be authorised for video release.

The band are in top form and the show both looks and sounds spectacular. The concert was held shortly before the release of their recent Stone Temple Pilots album (which reached #21 on the Australian Chart upon release in 2010) and the tracklisting combines new songs interspersed with their classic hits. This is a great live concert by one of the most successful rock acts of the last twenty years.

Bonus features include an interview with the band.
