

Sunix PCMCIA USB2.0 CardBus for evaluation

Fitting into a slot like a conventional PC card, the Cardbus features 3 ports with users being able to access their MP3 player, digital camera and external hard drive all at once. The Cardbus is backward compatible and transfers data at an amazing 480Mbps and gives instant expansibility for laptops. The future of data transfer becomes clearer with ByteZone.

The following assessment units are available now from Word Force Advertising & PR for evaluation.

What: Sunix PCMCIA USB2.0 3 Port CardBus

These products are well suited to any features on storage, security, data transfer and provide excellent break out for product showcases or new products sections.

The products have been provided for evaluation by ByteZone, specialising in portable storage solutions selling over the internet www.bytezone.com.au
