

# TURN YOUR COMPUTER INTO A PORTABLE ENTERTAINMENT CENTRE

With the Snazio Pocket PVR from ByteZone

Ever wanted to be able to turn your computer into a portable entertainment centre?

ByteZone introduces the Pocket PVR- a pocket video recorder that allows the viewer to watch TV or any external video source on your computer (laptop or desktop).

Also doubling as a video capture card, TV programs can be recorded to your hard disk in DVD quality and capture video from your video camera or VCR onto your hard disk, ready for playback and editing.

With a USB2.0 interface, an aerial can be connected to the PVR, TV can be watched on your computer and the programs can even be recorded to your hard disk!

Time-lapse recording allows the user to record and playback the same program simultaneously and recording can be done in different formats such as wave, avi and mpeg.

Complete with a remote control, the PVR requires no power adapter. The low consumption design allows the pocket PVR to use USB bus power and is compatible with Windows 2000 and XP.

The PVR package contains:

Pocket PVR Hardware

Remote Control

USB A-to-mini B cable

Audio Input Cable

Audio Output Cable

S-Video Cable

Composite Cable

Software and Driver CD

Quick Installation Guide
