

â€!wish I might, baby sleeps tonight

Bringing a galaxy of options to the nursery Oricom's new Secure610 baby monitor projects soothing 'starry night' images onto baby's ceiling.

Beyond the celestial ceiling and soft comforting night light the Secure610 keeps check on the climate, should the room become too warm or cool, an audible alarm will sound so it can be quickly rectified. Nineteen true tone melodies including classical tunes, lullabies and nature sounds bring calm to the nursery. While an easy-to-use parent talk back system allows you to soothe baby back to sleep with a few soft caring words. The Secure610 uses premium 1.8 GHz DECT digital technology to ensure zero interference, optimum distance and a secure connection to baby. You won't miss a single feed time, either, thanks to the Secure610's vibration alert with alarm function. An easy to read blue backlit display and sound sensitive light display shows you the time at a glance and a convenient torch comes in handy for trips to bub's room in the dark of night. Offering real portability, the Secure610 comes with a charging cradle and belt clip, allowing you to take it wherever it's needed, allowing you to get on with other tasks while bubs rests. "We are always seeking to find better ideas and designs in communication and pride ourselves on creating instinctive, useful technology so parents have the very best in baby monitoring," explains Oricom's Managing Director Kevin McDonnell. "The Secure610 not only offers crystal clear sound, privacy and security, it is durable, reliable and interference free. The Oricom Secure610 is a smart choice for safely monitoring your baby." The Secure610 will retail for \$199.00 and be available through premium baby stores from September.
