

AC Solar Warehouse Celebrates the Sale of its Fifty-Thousandth Enphase Microinverter

Melbourne, AUSTRALIA – 12 November, 2015 – Enphase Energy, Inc. (NASDAQ: ENPH), today announced a milestone achieved by one of its Australian distribution partners, AC Solar Warehouse, which marked the sale of its 50,000th Enphase Energy® Microinverter. The milestone signals continued momentum for Enphase in the Australian market since its 2013 entry, with the company expanding its Australian presence to two offices in 2015.

“AC Solar Warehouse is a highly valued partner for Enphase Energy in Australia,” said Nathan Dunn, managing director for Enphase Asia-Pacific. “Their years of experience, depth of technical knowledge, excellent customer service, and integrity make them the leading provider of AC solar equipment. Our strongly aligned values and approach to business have formed the foundations of what is a winning partnership, and we congratulate them on reaching 50,000 units.”

Established in 2011 to champion the uptake of AC Solar technology in Australia, AC Solar Warehouse has grown rapidly to become the largest distributor of microinverters and AC Solar modules in the Asia-Pacific region. The company now services hundreds of solar installers across Australia, the Pacific and South Asia. Notable solar installations recently completed by its customers include 100kW systems installed on the Alexandra hospital in Victoria, the ALDI store in Tweed Heads, the Beach House Hotel in Mackay and the Adelaide Entertainment Centre.

“Enphase Energy Microinverters represent the global benchmark for AC Solar technologies in terms of reliability, functionality and performance,” said Grant Behrendorff, managing director for AC Solar Warehouse. “In a market where safety and return on investment are increasingly important factors, Enphase Energy Microinverters are the logical choice for both residential and commercial PV systems. We are very proud to be working closely with Enphase Energy to bring this market-changing technology to our customers.”
