

Accellion positioned in the leaders quadrant of the Magic Quadrant for Enterprise File Sync and Sharing

Evaluation based on completeness of vision and ability to execute

Palo Alto, CA July 27, 2015

Accellion, Inc., the leading provider of private cloud solutions for secure file sharing and collaboration that ensure data security and compliance, announced that it has been positioned by Gartner, Inc. in the "Leaders" quadrant of the 2015 Magic Quadrant for Enterprise File Synchronisation and Sharing report.¹

"We're delighted to be placed once again in the 'Leaders' quadrant of the Magic Quadrant," said Yorgen Edholm, CEO of Accellion. "The world's leading corporations and government agencies find themselves increasingly under attack from cyber-attacks and rely on Accellion solutions to ensure data security and compliance. We believe our positioning reflects our tireless dedication to innovate and provide our enterprise customers with an industry leading secure content platform that securely connects people to enterprise content from any device, wherever work takes them."

This Magic Quadrant represents a snapshot of the Enterprise File Synchronisation and Sharing (EFSS) market, as of July 2015. The Magic Quadrant for EFSS solutions is intended to help CIOs and business and IT leaders that are developing their EFSS strategies to assess the right products or services to support them.

Enterprise file synchronisation and sharing (EFSS) refers to a range of on-premises or cloud-based capabilities that enables individuals to synchronize and share documents, photos, videos and files across mobile devices, such as smartphones, tablets and PCs. Sharing can happen between people (for example, partners and customers) within or outside the organization, or on a mobile device, as data sharing among apps. Access to files in enterprise repositories (such as file servers and content platforms) from mobile devices or remote PCs extends user productivity and collaboration to modern use cases. Security and collaboration support are critical aspects for enterprises to adopt EFSS.
