

ADT Security Australia has appointed Garry Parker to the position of Global Accounts Manager. Based in Sydney, Parker will be responsible for ensuring that the needs of ADT Security's global customers are being met at a local level and for the continued growth of the Global Accounts program. While liaising with his international counterparts on a daily basis, Parker will report directly to Mark Norton, Managing Director, ADT Security Australia. According to Norton, the new appointment recognises the complexity of managing security across borders. "As globalisation and technology advances continue, multinational enterprises need standardised security solutions for their facilities around the world. As the world leader in electronic security, only ADT can provide the kind of consistency and simplicity that these customers are seeking in their security operations, whether they are in New York or New Delhi, Sao Paulo or Sydney." ADT Security established the Global Accounts program in 2008 and has been investing in growing its capabilities ever since. Global Accounts customers include Google, Bank of America, Kraft and IBM. "The expectations of our Global Accounts customers are high," Norton explains. "ADT Security recognises the importance of exceptional service delivery and Garry will be instrumental in coordinating local sales and support teams to ensure we proactively serve these customers as best as possible." A graduate of Edith Cowan University in Western Australia, Parker holds degrees in business and business management. He has previously held sales roles within the electrical and fire protection industries.
