

## All Weather Shelters 'Shout Out' For Renovating Your Home When You Can't Leave the Country

As All Weather Shelters see it, Aussies are likely to be 'homebound' for quite some time

As All Weather Shelters see it, Aussies are likely to be 'homebound' for quite some time, due to the limitations being enforced on us throughout our country and beyond regarding overseas travel. So, how about doing something very specific and positive, that you can control, where so much uncertainty exists. This will be good for you, your family and the local economy.

As we move towards the back end of winter, and look to all things spring, what has changed over the last four to five months is that more people will be travelling short distances to local getaways that will be about one quarter of the duration of an overseas trip. Overseas trips on average cost \$20k for a family of four and last about three and a half weeks, so spending \$3-5k on a trip, not \$20k leaves a lot of spare money in the kitty.

So, what we're seeing is people spending money locally on tourism, which leaves a lot of money left over for other ventures, namely, the biggest asset for many Australians being the family home. All Weather Shelters suggest that you won't want to miss the opportunity to invest money in your immediate surrounds, to beautify the space you're now spending so much more time in.

It is normal during a recession that people would be pulling back on home renovations, but what is vastly different during this pandemic has been people staring at their walls over the lockdown. All Weather Shelters are experiencing a very welcome surge in customers asking for help in planning a new outdoor area, which they are more than happy to assist with.

Just think, you will have a new indoor/outdoor area ready for the beautiful spring and summer months in Australia, so for more information on outdoor roofing, patio builders Brisbane and outdoor living ideas please go to <https://allweathershelters.com.au> .
