

AMD Announces Athlon™ 220GE and Athlon™ 240GE; Available for Order Today

AMD announced the availability of the new Athlon™ 220GE and Athlon™ 240GE processors for order today, joining the Athlon™ 200GE in the reimagined family of AMD Athlon™ processors with Radeon™ Vega graphics. Built on the highly efficient “Zen” architecture leveraging the advanced socket AM4 platform allowing for future upgradability, Athlon™ delivers responsive, reliable computing experiences for everyone who surfs the web, watches video, and works on their PC.

Consumers around the globe are now able to select from three Athlon™ with Radeon™ Vega Graphics processors, increasing choice for those who demand efficient computing.

MODEL	CPU Cores	Threads	Processor Frequency	Graphics Compute Units	TDP (Watts)	SEP (USD)	AMD Athlon™ 200GE	2	4								
3.2GHz	3	35W	\$55	AMD Athlon™ 220GE	2	4	3.4GHz	3	35W	\$65	AMD Athlon™ 240GE	2	4	3.5GHz	3	35W	\$75

The AMD Athlon family of processors provides consumers with significantly better value and availability than the competition. Athlon 200GE processors offer up to 67 percent more graphics performance and up to two times greater power efficiency, delivering up to 84 percent faster high-definition PC gaming than the competition.

With increased clock speeds, the AMD Athlon™ 220GE and 240GE continue to deliver on AMD’s promise to offer increased responsiveness, choice, and value for everyday PC users, with reliable computing for everything from everyday needs to more advanced workloads like high-definition, out-of-the-box 720p gaming.
