

Installation of new solar panels to greatly reduce costs and help save the environment.

Melbourne, Australia – June. 30, 2015 – Andatech Director, Irwandy Tan is excited to announce the implementation of solar power into Andatech's Melbourne office.

The Melbourne office has had a revamp in the last couple of days, with the roof going through quiet a dramatic change.

"Solar power is something that we have been interested in adapting for some time" said Mr. Tan. "I'm very pleased that we have finally made the change."

Thanks to the efforts and advice from the team at Better Solar, we have been able to turn our interest in solar power into a reality.

The exceptional team over at Better Solar have done a fantastic job transforming the old roof, into a sparkling and fancy looking power conductor, with the installation of row upon row of solar panels.

We made the decision to install solar panels for many reasons. For one, using solar power lowers our overall energy costs, and two, it's good for the environment.

With the installation of the solar panels, we want to make a formal decision to be more energy efficient.

About Andatech Andatech was founded in 2003 as a distributor of Australian Standards Certified breathalyzers for Australians, and over the past decade has established a reputation as a leader in reliable wellness and occupational health & safety technologies throughout the Asia Pacific. Its range of quality products and services focus on its vision of a safe and healthy environment, at home and at work.
