

# ANGELUVE Brings Sustainable Fashion And Spirituality Together

A conscious fashion brand on a mission to empower the soul and to create a positive impact in the world

ANGELUVE, a conscious fashion brand based in Sydney Australia, was founded on the principle of spirituality and sustainability. It's on a mission to empower people to live an authentic life of passion and purpose and to create a positive impact in the world through conscious and sustainable fashion.

The impact of fashion on the environment is increasingly understood to be a problem, and the company wants to be part of the solution. The company is committed to making ethical and sustainable products that respect people, animals, and the planet. Each collection is carefully curated using sustainable materials that are friendly to the environment such as organic cotton, recycled fabrics, and plant-based fibres. This ensures its clothes do not cause any harm to the environment.

More than a clothing brand, ANGELUVE is a state of mind and a way of life. The brand sets out to make a positive difference by empowering people's lives and valuing conscious living. The brand's inspiration behind its design comes from spirituality. Its goal is to create unique products and experiences that nurture individual spiritual growth, as well as raise people's awareness around how they can live a life of passion, purpose, possibility, and potential.

The versatile collection features a range of soulful pieces of clothing that celebrate love, faith, positivity, self-belief, freedom, empowerment, and all things spirituality. Throughout the collection, inspirational slogans are used to serve as a reminder and to empower the wearer. The products are also energised with high vibrations of love and light. By choosing conscious fashion, wearers are spreading love and radiating positive vibes through the clothes.

The company is also committed to social and environmental sustainability and gives back to the community. A portion of sales goes towards charities with good cause including the Make-A-Wish Foundation, Thread Together, and Green Fleet. It takes pride in building a better world that is inspired by sustainability, ethics, and spirituality.
