

Anuj Luthra joins Bondle as Chief Technology Officer

Rapidly growing startup lands seasoned executive with deep technology and product experience

Bondle, the pioneer of person-centred collaboration, announced that Anuj Luthra has joined the company as the Chief Technology Officer. Anuj will oversee all of the company's technology initiatives.

"I'm excited to have Anuj join us as we enter the scale-up phase of our journey," said Sandeep Rao, co-founder and CEO of Bondle. "Anuj's experience in high growth organisations will be invaluable for Bondle. He will be leading growth initiatives and delivering a world class user experience."

Prior to joining Bondle, Anuj was the VP of engineering and product at ASX listed company Redbubble where he led the product engineering teams delivering core growth initiatives for the thriving marketplace. Prior to Redbubble, Anuj was co-founder of a SaaS startup delivering services to the travel industry.

"I am excited to join Bondle in its growth journey" said Luthra. "I believe we have a very compelling solution and a category creating offering for person-centred collaboration. I am looking forward to helping accelerate Bondle's growth story."

Anuj will be based in Melbourne and report to Sandeep Rao.

About Bondle

Sydney based Bondle is the pioneer of person-centred collaboration that puts a user at the centre of all their networks. It's the first platform that allows users to seamlessly interact with others on platform or on emails. Bondle is available on iOS, Android and on the web. For more information, please visit <https://bondle.app>.
