

Asbestos Cleaning, Meth Cleaning & Forensic Cleaning Services across Australia

Decon Solutions Australia is one of the largest decontamination services providers in Australia

Decon Solutions Australia is NAMC verified decontamination company which provides cleaning and decontamination services. We provide expert advice and a professional approach with guaranteed results – giving confidence and saving time and money.

Meth Cleaning and Decontamination Services Following a positive result from a meth residue test or a meth screen report you will need to consider a specialist meth decontamination company to remove and rebuild the contaminated areas of your home. Decon Solutions Australia are specialist meth decontaminators and meth house remediators offering meth lab residue cleaning and are capable of restoring your property safely and professionally. We are qualified to offer both meth clean-up and decontamination, as well as asbestos cleaning, investigation and clearance certification services. Our certified and highly experienced team work hard to deliver an unrivalled service. We are also offering 24/7 support for emergencies. Decon Solutions Australia does not provide any kind of testing services and only uses NAMC verified independent testing/screening companies to test properties or vehicles for any contamination. Decon Solutions Take Care of Asbestos Removal If you have discovered that you are living in or own a property that has asbestos in the building, you have two main options to help you move forward. Most asbestos contaminated properties will require removal and remediation work to be performed. Decon Solutions Australia does not endorse trying to attempt this yourself. You risk exposing yourself to the harmful asbestos dust. The quickest and least costly option is contact Decon Solutions Australia ASAP to bring your property back to inhabitable state.
