

blueAPACHE amongst the top ranked MSP companies world wide

blueAPACHE continued its rise up the ranks coming in at number four for the Asian and Australian region.

Melbourne, Australia – blueAPACHE, a leading managed network and cloud solutions provider for organisations with business critical IT requirements, marks its fourth appearance on Penton Technology's 8th annual MSPmentor 501 Global Edition - a distinguished list and report identifying the world's top 501 Managed Service Providers (MSPs). This year, blueAPACHE continued its rise up the ranks coming in at number four for the Asian and Australian region.

"We continue to focus on becoming a recognised leader in the IT as a Service and managed services business, so it's particularly significant for blueAPACHE to be recognised on MSPmentor's important industry report again this year," said Chris Marshall, blueAPACHE Managing Director. "We know that revenue growth and the breadth of our converged IT as a Service portfolio factored strongly in the selection criteria, and thank MSPmentor and Nine Lives Media for acknowledging our achievements as a world class provider."

"We want to congratulate blueAPACHE and look forward to covering their growth strategies in the year ahead," said Marcia Parker, Executive Director, Penton Technology Group.

Each year, MSPmentor gathers information for its annual rankings through the participation of managed service providers and IT service providers in its annual survey. The survey was conducted from December 2014 through January 2015. Rankings are based on Penton Technology's unique criteria for MSPs such as annual recurring revenues, total revenues and more.

This year the top MSPmentor 501 companies recorded higher recurring revenues than ever before. Combined, the total annual recurring revenues for all MSPmentor 501 2015 companies reached a record high of \$3.95 billion in 2014, up 26.5% year over year.

About blueAPACHE

Since 1998, the multi-awarded blueAPACHE has helped organisations in Australia, New Zealand, Asia and North America leverage technology to their business advantage by delivering comprehensive IT Management, Cloud, Network, Voice, Software and Consulting as a converged service – when they need it, as they need it.
