

# BUNDLE SELECTED FOR MORGAN STANLEY CTO SUMMIT IN SILICON VALLEY

Bondle is one of eighty companies participating in this event

Sydney, NSW -- Bondle Australia, the productivity and client engagement startup headquartered in Sydney, has been selected as one of 80 global finalists for the prestigious Morgan Stanley annual CTO Innovation Summit in Palo Alto on the 6th and 7th of June. Bondle was nominated for the Productivity and mobile client engagement category. The goal of the summit is surface the most innovative companies, which Morgan Stanley will invite to pilot across their business.

"It's a great honor for Bondle to be selected and for me to present our transformational product to Morgan Stanley's tech leadership," said Sandeep Rao, Bondle CEO. "They have a clear commitment to innovation and it is proven by the selection of companies of all sizes to participate. We are proud to represent Australia at the summit."

Bondle is a platform that organizes your professional interactions in one place, effortlessly. This includes the management of communication, documents and tasks on a secure platform. Bondle was selected for the CTO Summit for its ability to unify client communication while providing a high degree of security and ease of compliance.

"Our customers use Bondle to deepen trust with their clients and to build long term relationships with them," Rao explained. "In Australia, we think this is especially important given the impact of the Royal Commission these past few months. With Bondle, communication is transparent, organized and easily audited by companies and their customers. It's a great way to build trust."
