

Bookabin's Skip Bin Service Perfect For That Autumn Clean-Up

Autumn is always a good time of the year to be thinking about that bi-annual, clean-up around the property, as the advent of autumn means the days are getting shorter with not much time to get things done after work. We are also all becoming much more aware of the impact that the random disposal of household and garden rubbish can have on the environment. Improper disposal of waste can lead to hazardous consequences, and ecologically friendly waste management becomes an imperative in this environmentally aware world. Bookabin's Skip Bin service is the ideal answer to the question of how to dispose of unwanted garden waste and difficult to dispose of rubbish such as concrete, soil, clay, rocks, rubble, bricks, sand, asphalt and ceramic tiles.

The Bookabin website shows a different bin type for different types of rubbish, and by going to their easy to access website, people can choose the bin most suited to their particular type of waste. The identification of the type of waste is normally fairly straight forward. However, there is a simple guide as to what we can and can't place in a Bookabin skip. The waste type affects the price of skip services so it is important to choose the right one for our requirements. For instance, the bin for General Waste is suitable for light domestic and commercial waste, although Bookabin recommend checking with the bin supplier regarding mattresses, carpet and tyres which may incur extra costs.

Fairly obviously a Green Garden Waste bin is strictly for green garden waste only, which includes grass, leaves, tree trimmings, small branches, weeds and bark. Again, no asbestos or other hazardous waste or general waste is permitted, nor is cleanfill/hardfill, food waste, soil, cabbage trees, bamboo, flax, tree trunks or stumps.

Bookabin's online booking service offers customers great value for money by providing the lowest available price for refuse disposal, and its aim is to provide consumers with a high standard of service and excellent value. Bookabin have something for everyone whether it's moving house, a garden clean-up, a renovation project or a construction site. No matter how big or small those waste removal requirements are, they have skips to suit everyone's needs. Bookabin have real people with friendly customer service staff, ready to assist with any questions such as what waste types can be put into a skip bin. For further information on these guides, and on Bookabin's services, please visit their website at <http://www.bookabin.co.nz> .
