

Brisbane based Online Marketing Business Delivers New Product Offering for SMBs

[Virtual Storm releases new product offering to support organic SEO via online shop](#)

Virtual Storm, a Brisbane-based Online Marketing business that helps small-to-medium businesses generate more sales and customers through organic search engine optimisation strategy and services, has released a new product offering to the market.

Of the new product offering, Business owner Storm McManus said: "This is an offering that is designed to give businesses a deep insight into the current standing of their website from an SEO perspective. The report analyses various website fundamentals and delivers some clear recommendations for website improvements that businesses can make to increase organic traffic flow."

The offering is designed as the perfect starting point for businesses that are looking to increase their organic traffic but aren't sure of where to focus their efforts first.

"The SEO Site Analysis Report reveals data about a business that they just would not be privy to without running the analysis. Data that clearly highlights why the business may not be receiving as much organic traffic as they would like to. Furthermore, the recommendations delivered are unique to the business' online marketing goals and objectives" said Storm.

Other Online Marketing offerings developed specifically for SMBs that are available on the Virtual Storm online shop include:

- Keyword Research Report - Content Marketing Strategy - Sales Funnels 101 Workbook - Email Marketing Bundles - Copywriting Tools and Templates

All online offerings can be accessed via the Virtual Storm shop.

About Virtual Storm Virtual Storm helps SMBs generate sales and customers through organic SEO and content marketing. Owner, Storm McManus, has 20+ years experience in marketing sector, with the last eight years spent helping businesses manage their strategic online marketing efforts.
