

Business Academy Online Relaunches Today - Immediate Results

[Entrepreneur Guidebook Website](#)

Business Academy Online relaunches its website today - with immediate results. Previously, the Business Academy Online educational format consisted of a 6 month online business course, which had positive results and successful students. Business Academy Online has revamped the course, bringing students only the most relevant and up to date knowledge, strategies and techniques in Internet Marketing and Online Business in a 3 month course. Students are now exposed to the entrepreneurial strategies used by some of the most successful businesses on the Internet today. Leveraging the knowledge of the creators and co-founders Nicci Barnes, Lee Bush and team, students can enjoy opportunities not offered in any other course. This relaunch of Business Academy Online precedes the relaunch of another successful business of Nicci Barnes and Lee Bush - The Webonaire. Both Business Academy Online and The Webonaire will go hand in hand and offer students and affiliates unrivaled Internet Marketing opportunities. Business Academy Online now offers businesses project management and online marketing solutions for those businesses without the time to learn the online business strategies for themselves. Business Academy Online is now a full service education and business project management agency providing full circle service and knowledge for all online business. The website launches at 9am Monday 18th October 2010.
