BankEnergi III consortium wins the Innovate UK grant

carbonTRACK UK joins BankEnergi III consortium & wins Innovate UK grant

Birmingham, UK, June 17, 2020– BankEnergi III consortium wins Innovate UK grant to develop an industry leading 'end to end energy trading' solution. The Consortium led project will develop an end to end solution allowing energy to be traded from building to grid supply point.

carbonTRACK will leverage all its global expertise to provide a behind-the-meter solution with demand response and virtual power plant capability at the London South Bank University. The site will be used to demonstrate connection into the wider energy eco system through a ground-breaking open energy data integration layer which will integrate into carbonTRACK's VPP solution and create interfaces with various route to market providers. The resulting balancing of energy will set the standard to solve grid constraints caused by an aging and under capacity infrastructure. A whole energy system and flexible approach is widely recognized as a key strategy in delivering the UK's carbon neutral target by 2050.

The consortium consists of:

CONSORTIO LTD
4D ENERGY ADVISORY LIMITED
carbonTRACK UK LTD
FINTRICITY GROUP LIMITED
IBECCS LTD
LONDON SOUTH BANK UNIVERSITY
TONIK ENERGY LIMITED
WALES & WEST UTILITIES LIMITED, and
POWER TRANSITION LTD

About carbonTRACK UK

carbonTRACK UK, headquartered in Birmingham, is supporting the UK's innovation priorities. Since its Clean Growth category win of the UK Tech Rocketship awards, interest in carbonTRACK's decentralised energy management solution has been growing.

Its technology is connecting energy generators, energy distributors and energy consumers - delivering embedded networks, Virtual Power Plants and facilitating smart grids. It enables a distributed energy future.
