

CareMonkey Turns 3 - Launches Free Emergency Medical Database For Families

CareMonkey Free to Share With Family and Friends

MELBOURNE, November 15, 2016 - CareMonkey, the world's fastest growing Emergency Health and Safety platform, celebrated it's 3rd anniversary by releasing a new look interface and launching new features to allow users to create their own private emergency medical database for family and friends.

In the last 12 months CareMonkey has grown from a start-up to an established leader in Emergency Health and Safety. CareMonkey has eclipsed 1 million paid users, tripled their employee base, and won numerous awards including the Slush 2015 million-dollar pitch.

"CareMonkey started as an idea to share sensitive life saving information so that authorised carers knew exactly what to do, who to call, and what to tell an ambulance paramedic in an emergency," said Troy Westley, CEO of CareMonkey. "Since then we have become a trusted system used by schools, universities, sporting organisations, scouts and camping groups, businesses, and the disability sector."

CareMonkey automatically keeps medical and emergency contact details up to date, eliminating the time and hassle of paper-based medical and consent forms, and making this sensitive information available on mobile devices to authorised carers with a duty of care.

The new look design is more intuitive and allows users to easily share Care Profiles with families, friends and organisations.

"It's inspiring to hear our customers stories about how CareMonkey has come to the rescue in an emergency," said Westley. "The emphasis for this release was to make it easier to add and share profiles with their family members. Most families have somebody who has some type of medical condition such as allergies, asthma or epilepsy. Now users can make life saving medical instructions and emergency contacts accessible to their spouse, siblings, grandma and babysitters to ensure everyone is prepared for an emergency. It's easy to use and completely free for use by families and friends."

In the last 12 Months, CareMonkey has passed the 1 million paid user threshold and expanded to new markets including the United States, United Kingdom, Ireland, New Zealand, United Arab Emirates, Kazakhstan and the Philippines.

"We are fortunate to have so many amazing customers who took a punt on a new idea, and also continually give us great ideas to add new features," said Westley. "It has made the product so much better and more useful to everybody."

Top 10 New Features in the last 12 months:

1. Free Family Medical and Contact Database

Create and share profiles with relatives and other people you trust to care for your family.

2. Collect Payments

Reduce the hassle of collecting payments for memberships & excursions.

3. Injury Reporting

All organisations can now report injuries or incidents as they happen on mobile devices.

4. Roll Calls

Quickly track attendance on excursions, camps or field trips.

5. Improved eForm Builder

New features including Multi-Column List, Tables, and Attachments.

6. Organisation Hierarchy

Large organisations can deploy CareMonkey with a rolled-up view of all divisions, groups and clubs.

7. Faster Experience

Faster load times for web and mobile. Imports now 400% faster.

8. Better Integration

Improved APIs and integration for Synergetic, SAS2000, FOX SPORTS PULSE, TidyHQ and custom integrations.

9. New Windows App

CareMonkey App is now available on the App Store, Google Play and Microsoft Store providing offline access in emergencies.

10. 24x7 Live Chat

Live dedicated support chat available on the website and in-App.
