

CarePlus™ Senior Nurse Call & RTLS CarePlus™ Mobile Resident Call is the ideal Aged Care Solution

[Perth, Australia 27 May 2019] CarePlus™ has created one cohesive Nurse Call solution with integrated RTLS (Real-Time Location-System) for the aged care industry at NiQ Health with CarePlus™ Senior and CarePlus™ Mobile Resident Call. Designed with high-performance and quality workflow in mind, CarePlus™ delivers leading care management applications to significantly expand the benefits of Nurse Call systems with clinical-grade RTLS technology.

CarePlus™ Senior, as an innovative Nurse Call system which facilitates automated workflow, advanced technology, and forward-thinking communication, is the perfect match for CarePlus™ Mobile Resident Call. This clinical-grade, RTLS mobile device offers residents an empowering solution to page for assistance when help is required.

“Generating increased safety with a robust platform not only adheres to recommendations in recent Australian Royal Commissions to improve aged care sector practices, but ensures peace-of-mind for residents, their families, healthcare professionals, and administrators by encouraging the best care outcomes,” says Andrew Rotheron, the founder of NiQ Health. “It is imperative the increasingly demanding challenges faced by staff and administrators in aged care is confronted to provide efficiency, satisfaction, functionality and greater safety for residents.”

CarePlus™ offers aged care and acute care solutions, from Nurse Call to specific safety devices, since its launch in 2008. Further details on all products are available at NiQ Health’s website, <https://www.careplus-niqhealth.com.au>.
