

CommsChoice to Deliver Managed VMware SDWAN Services in Australia

FOR IMMEDIATE RELEASE

CommsChoice to Deliver Managed VMware SDWAN Services in Australia

15th April 2019

SYDNEY, AUSTRALIA

CommsChoice Group (ASX: CCG), an emerging managed services provider, today announced it will offer VMware SD-WAN by VeloCloud in Australia to accelerate customers' journeys to the cloud. CommsChoice's vision to serve the Australian geography is aligned with VMware's strategy to expand its software-defined wide area network (SD-WAN) footprint in the Asia-Pacific region and to enable multi-national businesses across the region to build more secure over-the-top networks leveraging economical public internet access.

Today's distributed enterprises struggle with application performance and WAN complexity at their branch offices. VMware SD-WAN by VeloCloud automates branch deployment and ongoing management, delivers performance of cloud and enterprise applications and enables IT departments to roll out branch offices virtually by using the cloud as the WAN. Rapid deployment - while fixed connections are being installed - and branch resilience are even made possible using wireless technology.

"CommsChoice aims to provide connectivity and collaboration using cloud solutions that will free customers from the burden of investing in hardware solutions," said Ben Gilbert, CEO of CommsChoice. "VMware is at the core of this initiative. By combining VMware SD-WAN by VeloCloud with CommsChoice's collaboration portfolio, customers can easily transform their business using a next generation branch network that combines better security and performance with a simple, centralised and abstracted management layer. This can help them adapt quickly to changing business and network conditions."

"We are pleased to partner with CommsChoice to serve the changing needs of enterprises in Asia Pacific," said Sasha Emmerling, Senior Director of Marketing, VeloCloud Business Unit, VMware. "CommsChoice has a pedigree of bringing cutting-edge technologies to the industry, and together we will provide enterprises with scalable, cloud-delivered, and cost-effective wide area networks." CommsChoice will showcase VMware SD-WAN by VeloCloud at AWS being held 1-2 May 2019 at the ICC in Sydney.

About CommsChoice

CommsChoice Group is a vendor-neutral information and communications technology (ICT) managed service provider. The company services mid-tier customers in Australia, New Zealand, Singapore and internationally using its hosted voice platform combined with innovative SD-WAN technology.
