

# Conserve It announces expansion into Europe

Conserve It, an international leader in Smart IoT Solutions, building automation and HVAC solutions, has announced the launch of their European operations. Conserve It Srl will be based in Italy, a country with a rich history in the development of HVAC systems, technologies and solutions. Headquartered in Melbourne, Australia, Conserve It partners with international leaders in Building Automation & Controls, Analytics & Visualisation, Sensors & Metering, Actuators & Valves and Remote Access Security and is one of the leading Distributors in the industry. As Developers, Conserve It builds market-ready, Edge to Cloud solutions through best-in-class hardware and software solutions as a Dell OEM, through the Conserve It range of Edge IoT Controllers. "This is an exciting time for the Conserve It team", said Chirayu Shah, General Manager of Conserve It. "Having worked closely with our partners based in Europe, expansion into the local region is a logical move for us as we continue to research and develop systems and solutions that ensure future opportunities and trends in our industry are realised." The Conserve It team has a wealth of knowledge and vast experience in control and optimisation solutions that ensure central plant equipment runs efficiently, minimises energy consumption and maximises cost saving opportunities. Conserve It comprises a team of certified and fully trained engineers and developers and have an ever growing International presence, with solutions deployed around the world in over 20 countries. Founded in 2007, Conserve It are the developers of the award-winning PlantPRO chiller plant control and optimisation solution. PlantPRO is deployed across six continents, 20 countries and 50 cities around the world covering over 2 million square metres of building space.
