

Coronavirus: How Pest Control Industries are handling this Outbreak by Marks Pest Control?

Before telling the role of pest control company, let us first know some of the basic facts about COVID-19.

Coronavirus is a zoonotic disease that means animals transmit it to Human beings. There are many questions related to this novel disease that are still unanswered like “what is the reason behind spreading of this virus?”, “What is the origin of the coronavirus?” are still not answered. Some of the Chinese based researchers think that Pangolin- a scaly mammal that eats ants has spread this virus to humans.

Also, people claim that “Bat” is the carrier of Coronavirus. But they do not directly spread the disease. There is intermediary animal civet cat and dromedaries camel that carries the virus SARS and MERS respectively to humans. The specific source of this disease is yet not identified.

COVID-19 has firstly shown its worst reaction in Wuhan in China. After that, it is quickly spreading in other states. Currently, 86 countries are fighting against this novel disease. Some of the measure cases are reported from South Korea (6,284), Italy (3,858), Iran (3,513), Germany (545), USA (232).

It is also affecting the financial economy of the country. The export and import of products and articles is restricted from the affected countries that have a direct impact on the financial market.
