

## Creative Concrete Coatings Enhances Property Values in Multiple Venues

At Creative Concrete Coatings, we'll help you bring to life any concrete surface with 100's of different design combinations.

Many homes and businesses were erected on concrete slabs, with a subfloor added that necessitated constant recovering in the form of carpeting, tile or vinyl. For those that have tired of the expense of installing new floor coverings, Creative Concrete Coatings has a solution that adds beauty and value to homes and businesses.

The company utilizes the existing concrete and transforms it into highly durable and hygienic stand-alone flooring that will last for decades. The grinding, resurfacing and polishing services available are equally applicable for basements, patios, and walkways to add beauty and value to properties. It's especially popular for creating distinctive surfaces for driveways and garages.

Polished concrete surfaces provide the luxury look of granite or marble at a fraction of the cost, with a high-gloss shine that can be customized in multiple ways. Concrete resurfacing Brisbane can include dyes, stenciling, and decorative aggregate embedded that ranges from glass and metal to seashells, beads and even innovative glow-in-the-dark materials.

Concrete grinding Brisbane removes stains, imperfections, irregularities, and old paint. It also smooths uneven or rough areas. Grinding prepares the surface for its transformation into an elegant floor with highly desirable aesthetics. The concrete can then be polished and creative touches added.

There's a wealth of advantages to polished concrete for home and business owners. It works particularly well for heavy traffic areas and it's beneficial for those with respiratory conditions. However, the two most attractive attributes to polished concrete Brisbane is that it's almost maintenance free and its luxury appearance. Polished concrete has become one of the most highly sought features for residential and business environments.

The services available at Creative Concrete Coatings are an investment in the beauty and value of homes and businesses. Properties with polished concrete floors, driveways, patios and pathways improve owners enjoyment and increases overall value in the marketplace should individuals want to sell. Polished concrete is an effective way to update an existing look inside or outdoors for a chic and sophisticated appearance.

About Creative Concrete Coatings Creative Concrete Coatings specializes in concrete resurfacing and decorative concrete with hundreds of decorative design combinations from which to choose. The company offers services for residential and commercial customers, along with free no-obligation quotes. Connect with them on Facebook, Twitter and Instagram.
