

D-Link partners with Globalgig to offer 4G LTE VoIP Router with 4G SIM card and \$30 credit in the box

Ready to use in 84 countries worldwide

Global connectivity specialists D-Link have partnered with low cost mobile broadband providers Globalgig to provide a 4G LTE VoIP Router, the DWR-922, complete with a Globalgig 4G SIM card and \$30 credit in the box allowing users to immediately access the Globalgig mobile broadband network in 84 countries worldwide.

D-Link MD Graeme Reardon explained, "In today's data-hungry world, connectivity is king. By partnering with Globalgig, we are now offering 4G mobile broadband users an excellent solution that works straight out of the box. You just insert the Globalgig 4G SIM card that comes in the box into the DWR-922, register it with Globalgig, select a plan and then you're good to go – it's that simple. Once connected to a Globalgig plan, you can immediately use the DWR-922 to check e-mails, surf the web, transfer data, stream media, make VoIP calls and send SMS messages. Globalgig 4G mobile broadband plans are excellent value, available month-to-month and there are no lock-in contracts, so our partnership means it couldn't be simpler to get a 4G LTE VoIP Router and mobile broadband that is low cost, effective and efficient."

The DWR-922 4G LTE Router lets users connect to their 3G/4G mobile connection with fast downlink speeds of up to 100 Mbps and uplink speeds up to 50 Mbps. The Router's phone port also allows a handset to be attached enabling high-quality Voice over IP (VoIP) calls.

Partnering with Globalgig gives D-Link customers several advantages. In the first instance users can immediately expand the benefits of the DWR-922 by using it in Australia and having access to 83 countries across the globe. The quality of the DWR-922 and Globalgig's 4G (Australia and UK) and 3G (rest of the globe) networks means users can share a business grade connection to the Internet. In a world where connectivity is king, using the DWR-922 in this way almost completely eliminates the possibility of being offline. The DWR-922 is also ideal for renters or students in temporary or shared accommodation.

Globalgig recently announced three new 4G mobile broadband plans - 4G Flexi, Go Europe & USA and Go Global (go to www.globalgig.com.au or see below for details) that start at just \$4.99 for 250MB of data in Australia and offer options that include up to 10GB of data available in 84 countries. Globalgig's plans and rates are some of the cheapest available in Australia (1GB is just \$10) where extra usage is charged at 2c/MB and never goes above 25c/MB in any other country in the world.

The DWR-922 utilises dual-active firewalls (SPI and NAT) to prevent potential attacks across the Internet and WPA/WPA2 wireless encryption keeps users' wireless networks secure and traffic safe, allowing them to securely share their 3G/4G connection without worrying about unauthorised users accessing their network.

To celebrate the launch of the DWR-922 and the new partnership, D-Link and Globalgig are giving away a DWR-922 4G LTE VoIP Router with \$120 of additional mobile broadband credit, as part of a D-Link Facebook promotion (www.facebook.com.au/dlinkAUNZ).

The D-Link 4G LTE VoIP Router complete with a 4G SIM card and \$30 credit in the box is available now online at www.dlink.com.au, selected stockists or in any Officeworks store for \$249.95.

Globalgig 4G mobile broadband SIMs are available online and at 1400 retail outlets across Australia including Dick Smith, Harvey Norman, Coles, The Good Guys, Big W, Nuance Airport Duty Free Stores and Joyce Maine.

To find out more about why Globalgig is increasingly being used both domestically and internationally by business, personal and family travellers alike and to select a suitable month-by-month plan go to: www.globalgig.com.au
