

## DexSafe Stress the Importance of Safety Barriers in the Workplace

Industrial safety barriers are crucial in any hazardous workplace as they play a major role in decreasing the incidents usually present in industrial working environments.

Industrial safety barriers are crucial in any hazardous workplace as they play a major role in decreasing the incidents usually present in industrial working environments. Worksafe reports that there is an average of 32 fatalities per year in different industries, including manufacturing and construction. It is no secret that there are many risks involved. As such, implementing warehouse safety procedures is necessary to lessen these mishaps.

As warehouse owners, it is your responsibility to protect your employees from heavy equipment and hazardous workstations. Pedestrian barriers are essential to ensure that passers-by are safe, and productivity can proceed uninterrupted, and DexSafe have three types of barriers, starting with PedSafe.

The PedSafe Barrier System keeps people away from caution zones of forklift trucks and other vehicles. It provides a clear visual barrier between walkways and warehouse traffic to ensure personnel safety. Since the PedSafe is fully modular, it can be used in long walkways and small areas and it reduces the possibility of accidents in the workplace.

Working in a unique environment busy with machinery, people, and large amounts of product will naturally involve numerous risks. Implementing safety barriers where traffic is high, such as loading and unloading areas, can give you and your equipment adequate protection. ForkSafe barriers, an impact barrier system, is a quality engineered barrier ideal for work environments such as factories. It is fully modular, which makes it suitable for most applications. It also features an integrative design which makes it possible to fit in with the PedSafe barrier for added protection.

SpanSafe is an expandable barrier that concertinas out to various lengths. It can be used in doorways, around machinery, and any place where a removable barrier is required. It is easy to install and is available in different heights to suit a variety of applications.
